

# Instruction Manual

24-05-V2-170

## Product Description

This product is a digital thermo-hygrometer that combines temperature humidity sensors to provide real-time monitoring of Temperature and Humidity on its digital LCD display. It is easy to operate, quality assured and worth buying.

1

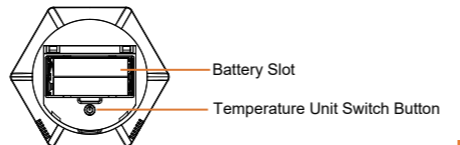

## How To Use

### 1. Turn On:

- Opening the back bracket and installing the battery, the device will start to work.
- You can place the device on the desktop or other flat positions.

### 2. Install Battery:

- Open the back bracket;
- Open the battery slot cover;
- Install the battery in the correct positive and negative directions;
- Close the battery slot cover.

2

### 3. Temperature Unit:

- Single-press Temperature Unit Switch Button to switch the temperature unit between Celcius(°C) and Fahrenheit(°F).

### Tips:

- Temperature : When the temperature is lower than -10°C, the reading displays LL.L°C, when the temperature is higher than 50°C, the reading displays HH.H°C.
- Humidity : When the humidity is lower than 10%RH, the reading displays LL.L%, when the humidity is higher than 90%RH, the reading displays HH.H%.

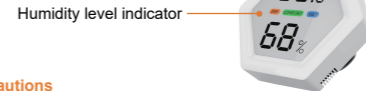

### Product List

Thermo-hygrometer	* 1
Product Manual	* 1

3

### Humidity Level Standard Reference :

	Humidity Level	Average Standard Value
Humidity	DRY	< 41%
	COMFORT	42%-70%
	WET	> 71%

### Precautions

- Keep away from high temperature, strong magnetism, and dusty environment.
- Please replace the battery in time when the battery is low.
- This Thermo-hygrometer is for reference of healthy life.

### Product Specifications

Item	Thermo-hygrometer
Product Size	91*80*22mm
Product Weight	66g
Display Method	LCD Display
Measuring Item	Temperature, Humidity
Atmospheric Pressure	12.5 PSI- 15.4 PSI
Sampling Time	1.5 Seconds
Operating Voltage	DC 3V
Temperature Range	-10°C-50°C(14°F-122°F)
Storage Temperature	-10°C-60°C(14°F-140°F)
Temperature Accuracy	±0.3°C
Relative Humidity	10%-90%RH
Humidity Range	10%-90%RH
Humidity Accuracy	± 5%RH
Power Supply	2*1.5V AAA Battery (Not Included)
